

Automatic Additive Injector System

Features as shown:

Our easy to use, emission-free, automatic additive injector helps you add products such as methanol, Pro200, Vapo-Kleen or CGX4 into your system. High-quality components include:

- Hydra-cell pump with a 1 HP explosion-proof motor capable of up to 3 gallons per minute.
- (1) GPI G2 Digital flow meter powered with lithium batteries for service up to 9,000 hours.
- (1) Hydra-Cell C46 pressure regulating valve.
- Aluminum base
- Explosion-proof start/stop switch and required electrical to the motor.
- 6' Pump inlet and bypass hoses.
- 10' Pump outlet hose.
- Liquid-filled pressure gauges.

Keeping operation simple:

- Pump can be connected to a 55-gallon drum of additive that is in a horizontal or vertical position.
- Pump outlet can connect to either the liquid or vapor piping.
- Meter automatically turns on when the flow starts.
- Turn on the pump and inject the desired amount of additive; turn off the pump when complete.
