

Product Overview:

Propane Cylinder Evacuation System

Let us design a cylinder evacuation system to meet your specific needs!

Eco-friendly and cost-effective

An alternative method to recover propane instead of flaring or venting ...

- Protects the environment and operator by keeping the propane contained
- Increases profit by allowing all of the propane to be recovered and resold
- Cuts down on time, reducing labor costs
- Can evacuate multiple cylinders simultaneously to maximize efficiency
- Can be custom-built to meet your specific needs!

Our Evacuation System includes:

- 320 gal. Quality Steel recovery tank
- Cylinder evacuation purge and vent piping
- Removable 20# and 100# cylinder inverter
- Operation valves for liquid/vapor transfers
- RegO® sight flow back check
- Recovery tank liquid level monitor
- Explosion-proof electrical
- Blackmer® compressor
- Pressure gauges for recovery tank and cylinders
