

Portable Gas-Powered Transfer Pump

Transferring liquid made easy:

Pumping liquid out of domestic tanks can be a hassle. Our portable gas-powered liquid transfer pump can help by:

- Transferring approximately 8-10 gpm, saving you time thus reducing labor costs.
- Saving wear and tear on bobtail pumps that are equipped with an auxiliary pump inlet.
- Transferring product from a longer distance if the tank is remotely located.
- Having a longer service life than a vapor compressor.

Our liquid transfer pump includes:

- Blackmer 1" Pump
- Honda Engine (gasoline) with Spark Arrestor
- Aluminum Base and Hose Hanger
- Sight flow back check for monitoring flow
- LC and Neptune flange adaptors for pumping liquid from a bobtail to a storage tank
